Profile

Final-year Data Engineering student at ENSA Al Hoceima seeking a 4–6 month internship. Hands-on experience in Python, SQL, ETL/ELT, data warehousing, Spark, Kafka, Airflow, and Power BI, with projects covering batch and real-time data processing, data quality, BI, and applied machine learning.

Experiences

AI & Data Science Intern, **Kénitra, Morocco**
Moroccan Center for Polytechnic Research and Innovation *07/2026 - 08/2026*
- Developed an end-to-end phishing URL detection pipeline using **Python, Machine Learning, and Elasticsearch**, processing **188K+ samples** and evaluating 4 models with 5-fold cross-validation, with automated email alerts for phishing-risk monitoring.

Data Analyst Intern, **Al Hoceima, Morocco**
Terra Nova EBS *07/2025 - 08/2025*
- Cleaned and transformed procurement data using **Excel and Power Query**, and developed **4-page Power BI dashboards** with DAX measures to monitor procurement KPIs.

Web Developer Intern **Al Hoceima, Morocco**
Provincial Hospital Center Med VI *06/2025 - 09/2025*
- Designed and developed the Administrator and Employee modules of a web application to **digitize radiology department operations**, and contributed to the local deployment and configuration of the application within the department.

Projects

End-to-End SQL Data Warehouse & Churn Prediction *GitHub Project Link* **02/2026**
- Built a Bronze/Silver/Gold SQL Server Data Warehouse with **19 data-quality checks**, a churn model achieving **97% recall** on **18,482 customers**, and a FastAPI/Streamlit app with a **5-page Power BI dashboard**.

Technologies: Python, SQL Server, T-SQL, FastAPI, Power BI

Job Intelligent Data Platform – Data Engineering & BI *GitHub Project Link* **04/2026**
- Built an ETL/ELT platform to aggregate job offers from multiple APIs, with automated ingestion and transformation workflows orchestrated by Apache Airflow.

Technologies: Python, Apache Airflow, MinIO, PostgreSQL, FastAPI, Power BI, NLP, Docker

TaaSim Casablanca – Real-Time Urban Mobility Platform *GitHub Project Link* **03/2026**
- Designed a **Kappa architecture** using **Kafka, Spark, and Flink** for real-time mobility data processing and integrated an ML model for demand forecasting.

Technologies: Kafka, PyFlink, Spark, Flink, Cassandra, MinIO, FastAPI, Docker

FHV Trip Data Optimization (MongoDB) *GitHub Project Link* **4/2025**
- Optimized **MongoDB** indexing and sharding on 16 million records, reducing query time from **61.8s to 7.8s**.

Technologies: MongoDB, Python, Dash

Skills

- **Data Engineering:** ETL/ELT, Data Pipelines, Data Lake, Data Warehouse, Spark/PySpark, Flink, Kafka, Airflow, HDFS, Trino
- **Programming:** Python, SQL/T-SQL, Java
- **Databases & Storage:** PostgreSQL, SQL Server, MySQL, MongoDB, Cassandra, MinIO
- **Data Analytics & BI:** Power BI, DAX, Data Modeling, Pandas, NumPy, Matplotlib
- **Development & Tools:** FastAPI, REST APIs, Docker, Git, GitHub, Streamlit

Education

Engineering Cycle – Data Engineering, **Al Hoceima, Morocco**
National School of Applied Sciences (ENSA) of Al-Hoceima *2024 – Present*

Preparatory Cycle, **Al Hoceima, Morocco**
National School of Applied Sciences (ENSA) of Al-Hoceima *2022 – 2024*

Baccalaureate – Physics & Chemistry, French track, **Ajdir, Morocco**
Lycée Rif *2022*

Certifications & Languages

Certifications: Advanced RAG with Vector Databases (Coursera); Advanced SQL (365 Data Science); Oracle Cloud Infrastructure; Supervised Learning (DataCamp).

Languages: Tarifit (Native); Arabic (C1); French (B2); English (B2); Spanish (A1); Chinese (A2)
