PROFILE

Second-year Data Engineering student with hands-on experience building ETL pipelines, SQL data warehouses (Medallion Architecture), and large-scale analytics pipelines. Passionate about AI and machine learning, with practical skills in Python, data preparation, and model evaluation. Seeking a June/July 2026 internship to contribute to real-world AI and data workflows.

EDUCATION

- Engineering Degree in Data Engineering** | ENSA AI Hoceima 2024 – Present
- Key coursework: Machine Learning, Big Data, NLP, Deep Learning, Data Mining, PL/SQL, SQL
- Preparatory Classes for Engineering Studies** | ENSA AI Hoceima 2022 – 2024
- Baccalaureate in Physics & Chemistry (French Option)** | Rif High School 2022

EXPERIENCE

- Data Analyst Intern** | Terra Nova EBS, Morocco July 2025 – August 2025
- Built interactive Power BI dashboards for the Procurement Department to analyze purchasing data and support decision-making
 - Cleaned and structured purchasing datasets in Excel, ensuring data quality for reporting
- Web Development Intern** | Provincial Hospital Center Med VI, AI Hoceima July 2025 – August 2025
- Designed and implemented admin and employee modules to digitalize the radiology department operations
 - Delivered a full-cycle web application with backend logic and user-facing interfaces

PROJECTS

- Uber Trip Data Analytics Pipeline** | Academic Project Nov 2025
- Built a processing and analytics pipeline on ~16M records, including preprocessing, transformation, and MongoDB storage
 - Reduced query cost significantly using indexing strategies (simple, compound, hashed) and analyzed execution plans
 - Implemented sharding for distributed processing and horizontal scalability
- Tech:** Python (Pandas, PyMongo), MongoDB, Dash, Query Optimization
- Machine Learning end-to-end-tp** | Academic Project Nov 2025
- Built two end-to-end ML pipelines on Kaggle datasets covering data preprocessing, feature engineering, model training, and evaluation
 - Applied regression models (ElasticNet, XGBoost) on the Ames Housing dataset with custom feature engineering, achieving RMSE of 0.11
 - Implemented Trained and compared classification models (Logistic Regression, SVC, XGBoost) on 60,000 Fashion-MNIST images — directly applicable to visual classification tasks
- Tech:** Python, Scikit-learn, XGBoost, TensorFlow/Keras, Pandas, NumPy

TECHNICAL SKILLS

- **Programming:** Python, C, SQL, Java, PL/SQL.
- **Data Engineering & Analysis:** Data Mining, Pandas, NumPy, Machine learning, Big data, NLP, Deep learning.
- **Visualization:** Power BI, Matplotlib.
- **Databases:** SQL Server, MongoDB, Oracle (PL/SQL).
- **Tools & OS:** Git, GitHub, Linux, Windows.

CERTIFICATIONS

- Advanced SQL for Data Engineering – 365 Data Science (2026)
- Data Cleaning and Preprocessing with Pandas – 365 Data Science (2026)
- Supervised Learning with Scikit-learn – DataCamp (2025)
