

Oumaima El Ghalbouni

Data Engineering Student

Al Hoceima, Maroc | elghalbouniomaima@gmail.com | 0616-869644 | [LinkedIn](#) | [GitHub](#)

PROFILE

Second-year Data Engineering student with hands-on experience designing scalable data pipelines, ETL workflows, distributed systems, and real-time data streaming applications. I have practical experience with Python, SQL, Java, Apache Spark, Kafka, Flink, Airflow, Docker, Cassandra, FastAPI, and Power BI. Experienced in data architecture, analytics, machine learning, and backend development. Seeking a Data Engineering internship where I can contribute to building reliable, scalable data platforms.

EDUCATION

Engineering Degree in Data Engineering / ENSA Al Hoceima 2024 – Present

Relevant Coursework: Machine Learning, Big Data, NLP, Deep Learning, Data Mining, PL/SQL, SQL

Engineering Preparatory Classes / ENSA Al Hoceima 2022 – 2024

High School Diploma (Baccalauréat) in Physics & Chemistry (French Option) / Lycée Rif Graduated: 2022

EXPERIENCE

Data Analyst Intern / Terra Nova EBS, Morocco July – August 2025

- Built interactive Power BI dashboards to monitor procurement KPIs and support strategic decision-making.
- Cleaned and structured datasets using Excel to ensure data quality and integrity for reporting.

Web Developer Intern / Provincial Hospital Center Mohamed VI, Al Hoceima July – September 2025

- Designed and implemented admin and employee modules to digitalize operations within the radiology department.

TECHNICAL PROJECTS

TaaSim — Real-Time Urban Mobility Platform / Team Project 2026

- Designed a Kappa architecture for a Transport-as-a-Service (TaaS) platform processing real-time data streams (GPS telemetry, ride requests).
- Implemented a Bronze/Silver/Gold data pipeline using Apache Kafka (ingestion), Apache Flink (stateful processing), Apache Spark (batch analytics), and Cassandra (serving layer).

Technologies: Kafka, Flink, Spark, Cassandra, FastAPI, Docker, MinIO, Grafana

JobIntelligent Data Platform — AI Data Ecosystem / Team Project 2026

- Contributed to building a platform that centralizes job offers via multi-source web scraping (Adzuna, Arbeitnow, Reed).
- Participated in developing a Medallion architecture (Bronze/Silver/Gold) with workflow orchestration managed by Apache Airflow.
- Set up a FastAPI backend and an S3-compatible Data Lake (MinIO), containerized using Docker Compose.
- Integrated NLP processing for entity extraction (skills, salaries) and designed final visualizations via Power BI.

Technologies: Python, Apache Airflow, FastAPI, PostgreSQL, MinIO, Docker, NLP, Power BI

TECHNICAL SKILLS

- Programming** : Python, SQL, Java, C, PL/SQL, JavaScript (Basics)
- Databases**: SQL Server, MongoDB, Oracle (PL/SQL), PostgreSQL, Cassandra
- Data Engineering**: ETL, Data Pipelines, Data Lakes, Batch Processing, Stream Processing
- Machine Learning**: Scikit-learn, NLP, Deep Learning
- Visualization**: Power BI, Matplotlib, Dash
- Big Data**: Apache Kafka, Apache Flink, Apache Spark, Apache Airflow
- Backend & DevOps**: Git, GitHub, Linux, Docker, FastAPI

CERTIFICATIONS & LANGUES

- Advanced SQL for Data Engineering – 365 Data Science (2026)
- Data Cleaning & Preprocessing with Pandas – 365 Data Science (2026)
- Supervised Learning with Scikit-learn – DataCamp (2025)
